BACHELORS OF COMPUTER SCIENCE

COMSATS University, Islamabad

2015 - 2017

FSC PRE - ENGINEERING

Bahria College NORE - 1 Karachi

PROJECTS

2020 - 2021

DYSLEXIA DIAGNOSIS USING ML

Final Year Project - A small web application developed using React JS, Material UI and Python Flask. This application helps diagnose dyslexia in children at early stage through the use of machine learning algorithms.

2021

LANDING PAGE - NEXT.JS

A fully responsive landing page developed using Next.js and Theme-UI for hands-on practice in the said technology and to extend my portfolio

2021

BUSINESS WEBSITE - REACT JS

A complete responsive website developed by only using styled components for React JS. This website was developed as hand on practice for the said technology.

2020

COVID-19 APP - REACT NATIVE

Semester Project - A small Covid App that I made in my 6th semester using React Native. The app connects to an open source API and fetch and updates the current data about covid-19 all around the world

2020

TEXT SUMMARIZATION - KERAS

Semester Project - This is a semester project that I developed for our machine learning course. It is developed using Keras and LSTM models and provides abstract text summarization.
